

HARROGATE BUSINESS CENTRE

Dedicated, Secure, Symmetrical & Reliable

A leased line provides **symmetric bandwidth where the upload speed is the same as the download speed**. A broadband service is typically an asymmetric service where the upload is less than the contracted download speed.

Harrogate Business Centre has a 1/GB leased line internet connection providing a fully managed line with 24/7 monitoring. Average uptime over the last 4 year period has been 99.99% and 99.999% over the last 12 months. Any downtime was due to planned outages.

Each office has Wi-Fi access provided with Radius authentication which segregates clients suites on the main router This means that each office has its own individual login for Wi-Fi and once logged the network is secure from each other connected client which enables you to share data within your office securely.

Cable connection is also available which can be configured to suit your needs.
